- 1. At 0330 on 7 July 1955, a column with 4 two-load 203-mm howitzers, 10 tractors with T-34 chassis, and 10 trucks entered the General-feldzeugmeister Kaserne (2001) in Brandenburg from the direction of the Brandenburg-Altstadt railroad station. On 8 and 9 July. guns and vehicles were cleaned in the installation. Twenty large tarpaulins were spread out for drying in the barracks yard on both days.
- 2. On 4 July, 85-mm and 37-mm AA guns and trucks were assembled in the Friedrich-Franz Kaserne (2201) in Neuruppin. At 1930, 4 trucks towing 37-mm AA guns left the installation for the railroad station. At 2300, 25X16 x 85-mm and 9 x 37-mm AA guns and trucks were seen on a train at the Neuruppin freight station. Two trucks with 2 x 37-mm AA guns were seen in front of the loading ramp ready for entraining. In the evening on 5 July, the quarters of the AAA unit in the Friedrich-Franz Kaserne were dark. 2
- 3. On 8 July, the unit from the Alte Grenadier Kaserne (2225) in Neustrelitz had returned. The installation was occupied by an estimated 300 soldiers. Prior to 7 July, the restricted area on Gerhart Hauptmannstrasse in Neustrelitz was only lightly occupied, while the officer billets were fully lighted. After 8 July. the installation was again occupied to capacity by about 500 soldiers wearing red-bordered black epaulets with tank insignia. The quarters were fully lit. Between 6 and 8 July. the Neue Infanterie Kaserne (2221) in Neustrelitz was occupied by some 250 soldiers wearing red-bordered black epaulets. On 8 July, the Schlossgarten restricted area (2227) in Neustrelitz appeared to be konly lightly occupied. 3
- 4. It was learned, that 12 JS-1 or JS-2 tanks were unloaded at the Neubrandenburg freight station on 19 June. Numerous fresh imprints of tank tracks led to the Panzer Kaserne (2181) in Neubrandenburg. On 27 June, 6 JS-1 or JS-2 tanks were unloaded and left for the installation.
